

Educonnect is an integrated software suite for schools to increase efficiency, reduce costs, and improve their management and administration. Our platform is designed to be used by Pre-school to High schools, as well as small colleges and universities.

Comprehensive & Flexible

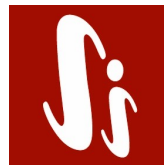

Educonnect is a seamless experience in which all modules and tools are tightly knit together to eliminate redundant tasks, simplify data sharing, and ensure data integrity. Our roadmap includes over modules that cover all facets of a school's administration and educational processes. These modules were designed from ground up to accommodate a wide variety of education institutes. They can easily be customized in order to meet unique needs, languages, and requirements.

Web-Based & Secure

The entire Educonnect system is Web-based, providing real-time access to all features from any standard Internet browser. Educonnect offers enterprise-level availability, data protection, and security.

Engaging

Educonnect encourages parents to be more involved in their children's education and forges a stronger school community by providing access to data.
